

Vedran Premužić

Keynote Lecture: Better implementation of CRRT: from animal models to human studies and vice-versa

Learning objectives

To show studies and advancements in CRRT on animal studies and how a critical care physician can implement this to his routine practice

To show new approaches and indications verified in human studies and how can that be extrapolated to veterinarian medicine

Lecture content/Text

To show the latest publications and achievements in the field of CRRT in both human studies and animal studies and how these results can be implemented in a standard, every-day clinical practice.
