

Thom Watton

Thoracic Trauma: Diagnostic Imaging | *Thom Watton*

This lecture is one of a three-part multi-disciplinary series. Lectures will progress from presentation and stabilisation, through diagnostic work-up including imaging to conclude with surgical interventions. Aims for the session include:

- Learn to systematically appraise thoracic radiographs
- Identify radiological features of common traumatic thoracic lesions
- Correlate radiographic findings with clinical assessment to determine appropriate management steps

Abdominal Trauma: Diagnostic Imaging | *Thom Watton*

This lecture is one of a three-part multi-disciplinary series. Lectures will progress from presentation and stabilisation, through diagnostic work-up including imaging to conclude with surgical interventions. Aims for the session include:

- Learn to systematically appraise abdominal radiographs
- Identify radiological features of common traumatic abdominal lesions
- Correlate radiographic findings with clinical assessment to determine appropriate management steps
